2019-2018 Thirst Relief Wells

Thanks to the Generous Support of Penny Appeal USA Donors.
Pakistan Tehsil Shorkot Village Chah Faqeeran Wala

Water access in Pakistan is a big problem, especially in more rural areas. The majority of the families in these areas have no access to clean water at all. The few safe water sources that have been installed are shared by the entire village, this means that people have to wait to collect water, the wells are susceptible to contamination and are not always available for use. With no alternative, every day, women and children have to walk for miles to find water or they and their families drink whatever water is available, despite the health risks. The journey can take hours meaning that the women are away from home most of the day and the children miss out on going to school.

The installation of the hand pump has had a worthwhile and lasting impact on the family. Before the well was installed, due to the lack of clean water, proper sanitation was not possible for the family. This meant that they were at a much greater risk of contracting water-borne diseases. Now, thanks to their clean water supply, they are able to save time, stay healthy and the children can thrive.

“This hand pump will make our life better. Thank you.”

“This today I am happy that our donor has provided us this hand pump to our family. Thank you for this precious gift.”

“This thank you donor for providing us with clean water.”

“This today, I am happy that someone like you donor has provided us one hand pump to our family. We are drinking water and I am thinking of my children education in future. Thank you!”

Through our Thirst Relief programs, we’re providing safe water to enable locals to drink, wash, clean and irrigate their crops as well as hydrate their animals. Our Thirst Relief programs lead to healthier lives, better educated communities and a route out of poverty.

“Thank you donor for providing us with clean water."

“Today, I am happy that someone like you donor has provided us one hand pump to our family. We are drinking water and I am thinking of my children education in future. Thank you!”
131 Wells have been completed

Of these, Penny Appeal USA general donations helped with:

- 2 deeps wells in Somalia
- 10 deep wells in Pakistan
- 1 deep well in Niger
- 1 deep well in Gambia
